EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

In claim 1, line 2,

--deposited-- was added before "under".

Authorization for this examiner's amendment was given in a telephone interview with Mr. Risso on 8/11/2006.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Claim 1 is allowed because prior art does not fairly teach or suggest the strain *Bacillus odysseyi* NRRL B-30641. As correctly argued by applicant, the prior art strain *B. nealsonii*, ATCC BAA-519 differs from the claimed strain in various properties. Even though the strains are isolated from similar environments, one of ordinary skill in the art would have recognized at the time the claimed invention was made that the strains are not identical or obvious over each other based on differences such as belonging to different rRNA groups, differences in colony morphology on TSA media, differences in growth patterns on sugars, as well as differences in growth under various conditions of pH and temperature.

In addition, the claim of record is patentable over the La Duc *et al.* reference, because the La Duc *et al.* abstract is not enabling for the specific *Bacillus odysseyi* as claim designated. One of ordinary skill in the art would not have been able to make and/or use the specific strain *Bacillus odysseyi* NRRL B-30641 based on the disclosure presented in the cited abstract at the time the claimed invention was made.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
